

FOR IMMEDIATE RELEASE

**BUILD CHANGE NAMED A
2008 TECH AWARDS LAUREATE BY THE TECH MUSEUM OF INNOVATION**

Build Change is One of 25 Innovators From Around the World Recognized for Applying Technology to Benefit Humanity

(SAN JOSE, California) Sept. 10, 2008 – Build Change, an international social enterprise with programs in Indonesia and China, was today named a 2008 Tech Awards Laureate, one of 25 global innovators recognized each year for applying technology to benefit humanity and spark global change. The Tech Awards, a signature program of The Tech Museum of Innovation, and presented by Applied Materials, Inc., selected Build Change from among hundreds of nominations representing 68 countries.

Build Change designs and trains builders and homeowners to build earthquake-resistant houses in developing countries using locally available skills and materials. The designs are affordable, sustainable, easy to build and culturally appropriate, and ensure that each homeowner has access to affordable technology to build a house that will not collapse and injure or kill their families in an earthquake, regardless of their income level. www.buildchange.org

The Tech Awards: Technology Benefiting Humanity is one of the premier annual humanitarian awards programs in the world, recognizing technical solutions that benefit humanity and address the most critical issues facing our planet and its people. The awards program honors 25 scientists and innovators annually alongside the recipient of the Global Humanitarian Award. Laureates are selected by a prestigious panel of international judges organized by the Center for Science, Technology, and Society at Santa Clara University, and made up of Santa Clara University faculty as well as leaders from educational and research institutions, industry and the public sector around the world.

“It’s an incredible honor to be recognized by The Tech Awards for promoting and implementing earthquake-resistant, low-cost building technologies,” said Dr. Elizabeth Hausler, Build Change’s founder and CEO. “We are humbled and proud to be among those recognized for their work, and even more inspired to continue to work hand-in-hand with local builders and homeowners to identify affordable solutions that keep them safe.”

“This year’s international roster of Laureates demonstrates the exceptional and creative applications of both high and low-tech solutions to change the world,” said Peter Friess, president of The Tech. “By celebrating the accomplishments of these 25 Laureates, we are encouraging future innovators to harness the incredible power and promise of technology to solve the challenges that confront us and make the world healthier, safer and more sustainable.”

Established in 2000, The Tech Awards recognize 25 Laureates in five universal categories: education, equality, environment, economic development and health. These Laureates have developed new technological solutions or innovative ways to use existing technologies to significantly improve the lives of people around the world. One Laureate in each category will receive a \$50,000 cash prize during the annual Awards Gala in San Jose, Calif. on November 12.

This year, the 2008 Laureates represent the truly global vision of the program, spanning countries such as Senegal, Peru, Hungary, Canada, Namibia, Germany, Egypt, India, United Kingdom, Laos and the United States. Their work impacts people in many more countries worldwide.

The Tech Awards collaborate with humanitarian, educational, and business partners through global outreach efforts, giving people around the world the opportunity to benefit from the successful technologies recognized through the Awards. The selected Laureates' projects address multiple humanitarian efforts including narrowing the digital divide, expanding renewable energy, improving multilingual education and empowering women in developing countries.

Key sponsors supporting The Tech Awards include Applied Materials, Inc., Intel Corporation, Accenture, Microsoft, The Swanson Foundation, BD Biosciences, Polycom, Genentech, Wells Fargo, SAP, eBay, KPMG, Cadence, The Quattrone Foundation, Omidyar Network, NASDAQ OMX, HP, Google, Cisco, Scott Cook and Signe Ostby, NBC11, Ogilvy Public Relations Worldwide, The Fairmont San Jose, Montgomery Hotel, Marriott San Jose, American Airlines and Siltronic. Key partners include Santa Clara University's Center for Science, Technology, and Society, World Federation of United Nations Associations, United Nations Development Programme, World Bank Institute, Catholic Relief Services, The CORE Group, National Center for Technology Innovation and Opportunity International.
