Part III Statement of Program Service Accomplishments

Check if Schedule O contains a response or note to any line in this Part III

1 Briefly describe the organization's mission:
Build Change's mission is to greatly reduce deaths, injuries and economic losses caused by housing collapses and school collapses due to earthquakes and typhoons in emerging nations.

2 Did the organization undertake any significant program services during the year which were not listed on the prior Form 990 or 990-EZ? Yes No
If "Yes," describe these new services on Schedule O.

3 Did the organization cease conducting, or make significant changes in how it conducts, any program services? Yes No
If "Yes," describe these changes on Schedule O.

4 Describe the organization's program service accomplishments for each of its three largest program services, as measured by expenses. Section 501(c)(3) and 501(c)(4) organizations are required to report the amount of grants and allocations to others, the total expenses, and revenue, if any, for each program service reported.

4a (Code:) (Expenses \$ **2,320,722** including grants of \$ **2,505,699**) (Revenue \$)
Haiti: Build Change has been working in Haiti since the earthquake in 2010 and has become the leading implementer of homeowner-driven retrofitting and reconstruction in Haiti, having built and retrofitted more homeowner-driven houses than any other agency. Rezo, Haitian Creole for network, celebrated its first full year in September of 2016 and has solidified Build Change's position as a pioneer in the creation of permanent change in construction through competitive business practice and public-private partnerships. Hurricane Matthew made landfall in Haiti on October 26,2016. With support from RMS, Build Change engineers assessed the storm's impact on the built environment as well as the ability of local builders and blockmakers to respond to construction needs. No houses built with Build Change technical assistance were damaged. The Haitian Government's Unit for the Construction of Housing and Public Buildings (UCLBP) continues to support the AREMA Center for Reconstruction Assistance in Martissant alongside our team. In 2016 engineers evaluated 44 houses or plots in this Port-au-Prince neighborhood, and designed 43 retrofits or new buildings while training 20 builders and 24 homeowners in safe construction practices throughout the process. By the end of the project in August 2017 there will be a total of 233 housing units providing safer housing for 235 families. LAMIKA, a holistic American Red Cross-funded program that included strengthening homes and upgrading sanitation and water access, was completed in Campeche

4b (Code:) (Expenses \$ **217,931** including grants of \$ **595,012**) (Revenue \$)
Indonesia: 2016 marks our eleventh year working with communities in Indonesia to save lives in earthquakes and build local capacity. Local government, school committees, and the community are working with us to retrofit one school building in Padang with support from Thornton Tomasetti Foundation and the New Zealand Embassy. Through the Bata Jaya Cooperative, local small businesses have sold over 1 million good-quality bricks. In total, over 8.2 million good quality bricks have been produced by trained small businesses in the area. Good bricks make construction safer across disaster-prone West Sumatera, and leveraging quality through a cooperative allows small brickmaking businesses to reach more customers and free themselves from moneylenders.

4c (Code:) (Expenses \$ **269,218** including grants of \$ **190,652**) (Revenue \$)
Philippines: Homeowners in Pembo, a neighborhood in Metro Manila, have demonstrated interest in retrofitting their homes after hands on market-research activities conducted with support from IDEO.org. Ways to improve access to financing and technical resources for retrofitting are now being developed and tested with additional support from Lloyd's Charities Trust.
Twelve officials from the Government of Bhutan came to the Philippines to learn about confined masonry construction. The Bhutanese officials visited housing construction programs and Build Change's training center to gain hands-on experience designing and building confined masonry houses.
7245 children are learning in safer classrooms across Cebu province thanks to a partnership with Caritas Switzerland and the Ramon Aboitiz Foundation, Inc (RAFI). RAFI is using a safer classroom design and training communities to engage in monitoring classroom construction.

4d Other program services (Describe in Schedule O.)
(Expenses \$ **1,561,368** including grants of \$ **1,558,709**) (Revenue \$)

4e Total program service expenses **4,369,342**

and other neighborhoods near Port-au-Prince. By the end of the project 522 families are now living in 185 safer houses, and 472 students are in schools.

Builders in the north of Haiti now have access to competency-based skills training. Alongside USAID, CECI, Global Communities, and other local organizations, Build Change opened the first safe construction training center in the North department, which is a growing economic region of the country.

370 new students used the training center and curriculum at Eastern Samar State University (ESSU) in 2016. The center opened in 2015 in partnership with the Technical Education and Skills Development Authority (TESDA), and has since trained 582 construction professionals in safe building techniques. Thirty-one families are now living in safer homes outside the storm surge zone, thanks to a partnership between Give2Asia, the Guiuan Development Foundation, Inc. and Build Change. Homeowners and local builders benefitted from technical assistance and training to build safer homes.

In Colombia, we have been focused on building resilience of cities before the next disaster - a first for the organization. Preventing building collapse before disaster has the potential for an even greater impact than post-disaster reconstruction through avoiding death, injury and destruction in the first place. On August 3, Maria Amalia Suarez's house in Bogota became the first retrofit in Colombia to break ground under supervision of Build Change, in partnership with city authorities. Maria has three generations, a total of seven people, living in her single story, three-room house. She lives in a house which used to be controlled by one of the illegal armed groups, who extorted her multiple times to "pay rent" on the land that she already owns. In partnership with Build Change engineers, Maria pointed out that the rear of her house where her kitchen and bathroom are located were not up to code. We designed walls to separate her from her neighbors who live behind her. The designs were updated to include these walls.

Nepal Program Expenses \$1,142,221 Including Grants of \$1,316,997

In Sindhupalchok district, 25 students are learning in a newly retrofitted school building with support from ENECO. This project paved the way for other schools. Twenty schools, a total of 60 buildings, in the Lalitpur district have been evaluated for vulnerability to earthquakes, and now have specific retrofit recommendations to make them more resilient. Rato Bengala Foundation commissioned seismic vulnerability assessments of the schools, and Build Change is able to propose specific retrofitting requirements for each of them.

The Government of Nepal has increased the number of disaster-resistant technical resources available specifically focused on how to address to severe damage during the 2015 earthquake. Homeowners, school officials, and government agencies now have access to retrofit designs for houses, and construction designs for lightweight school buildings and confined masonry houses.

Community theatre is a long standing tradition in Nepal. Together with a local theatre partner, we developed a new theatre piece about the 101 earthquake-resistant construction. Over 32,000 people have seen the humorous, educational, and entertaining story about simple ways of building a home.

To date, 569 builders have been trained in safe construction, including on-the-job training in new constructions and retrofitting techniques.

With help from our partners around the world, we are leveraging technology to make safer houses and schools attainable for everyone. Homeowners and others now have access to key information in the palm of their hand, and can directly contact our team of technical experts for advice. We have made access to the technology to a wider audience through other organizations working in post-disaster reconstruction in Nepal. Drones are becoming a part of post-disaster work, and we are now analyzing how to use them to guide safe construction and inform planning of our programs. With the support of the Civil Aviation Authority and the Ministry of Home Affairs in Nepal, the use of drones has allowed our team to survey buildings and potential construction sites from the air. With support from Autodesk, we are now using the collected aerial images to support homeowners in building back safer, more resilient homes. Fulcrum has worked with us to adapt its data-collection application to enable construction-site monitoring and supervision services through mobile devices at Build Change sites in Haiti and Nepal. In Nepal alone, more than 2,000 homeowners are followed by this system, which gives them access to real-time advice and an extra layer of supervision.

Innovations Program Expenses \$125,365 Including Grants of \$28,774

In addition to its country-specific programs, Build Change has several initiatives that support all of its programs and its world-wide mission in engineering, education and advocacy and promotion. It includes training for all of its engineers and trainers, as well as participation in several programs across the globe that aim to increase awareness of its approach to building houses and schools that are resistant to natural disasters in developing nations.
